Aadit Kamat

Software Engineer Intern at Learnseeker

Summary

I'm currently an undergraduate student majoring in Computer Science at the School of Computing, National University of Singapore. As a college student, I delight in the fact that I have thus far been exposed to different tools and technologies and gotten the opportunity to step out of my comfort zone. I hope to extend the learning journey beyond what the school has to offer and believe that a great platform to do this is through internships. That is why I am open to job opportunities and involving myself in new experiences.

Experience

Learnseeker

Software Engineer Intern

December 2018 - Present

NUS Furnace, Singapore

- Restructured the form in the main website to handle user inputs differently
- Used amatch's Natural Language Processing (NLP) capabilities to parse free form text input

from users and separate them into respective subject and level inputs for the backend

- Implemented a basic SMS Dashboard with a line chart rendered for an Active Admin page for

visual data analysis

- Added Data Tables for Marketing Dashboard

- Created new filters for an Internal Content Resource Management (CRM) software

built with Ruby on Rails

- Used Ruby on Rails' Active Record framework to make database manipulations

Singapore Civil Defence Force

Full Time National Serviceman

May 2015 - May 2017 (2 years 1 month)

National Service Training Institute (NSTI)

- Handled enlistment of NSF's into the force
- Streamlined administrative processes for recruits adjust to way of life and culture in a disciplined organisation
- Organised cohesion events for colleagues within NSTI
- Managed a team of 13 NSF's conducting internal administrative audits and supporting events such as recruit's Passing Out Parade & NSF Promotion Ceremonies in the role of a Non Commissioned Officer (NCO)
